DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 10 provides for the use of cyclopenta[a]naphthalene derivative, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

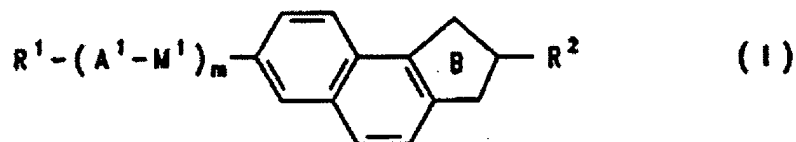

3. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by CAPLUS 1955: 8181.

The reference compounds having the present cyclopenta[a]naphthalene core with subformula (e) (wherein n=0, R =methyl, ethyl, n-propyl and n-butyl groups, E¹=hydrogen,

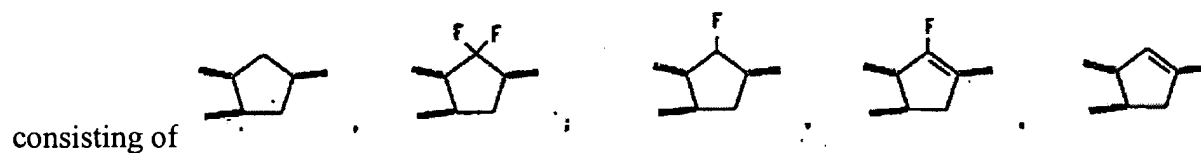

X¹⁻³=hydrogen) anticipate the claimed compound of formula I. See the formula structures in the reference.

4. Claims 1-6 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 4,434,975.

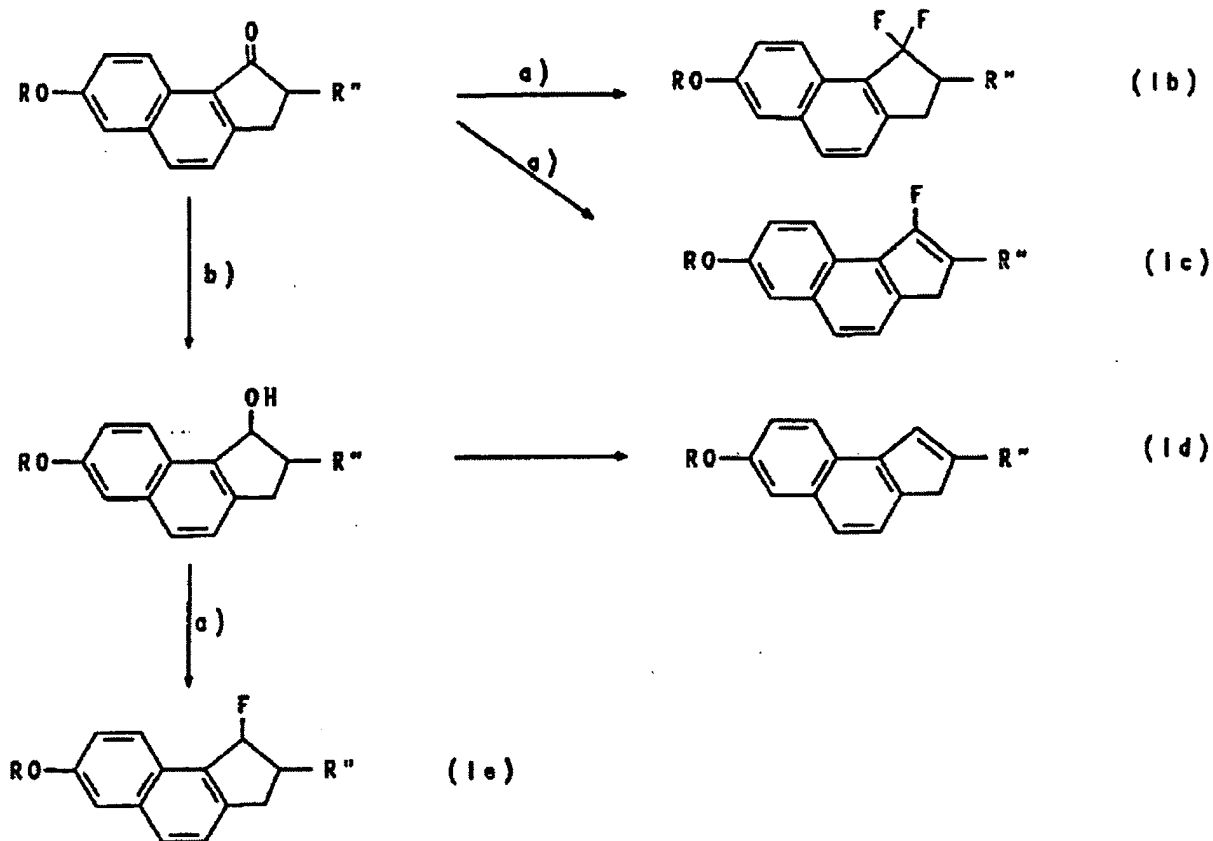

The reference discloses the compounds having a cyclopenta[a]naphthalene core (formula I), which are useful for LC mixtures and display devices.

where the notations are described in the reference. The ring B is selected from the group

Particularly, see the scheme 3 on page 13.

. The above compound formed by scheme 3 read on the present formula I with sub-formula f. Therefore, the reference anticipates the claimed invention.

Allowable Subject Matter

5. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
